# INDIV<sup>®</sup>

Broad Expertise & Quality Products

**Founded in 1964, INDIV has an outstanding image in the international market supplying customers in Latin America, South America, the Caribbean, Africa, Asia, Europe and now in the USA.**

### **We Are a Global Supplier With Local Service**

INDIV is an international brand for poultry equipment and systems manufacturer, from production to process. From small farms to larger turn-key projects, INDIV has the quality products, support and experience to help your business.

### **Centrally Located**

INDIV's headquarters is centrally located in Springfield, MO. with our USA warehouse located in Buffalo, Missouri, allowing us to ship products to our USA Customers in a timely manner.

**Over 50 years of experience** has allowed us to develop and manufacture our own products, as well as representing other reliable manufacturers of poultry and swine equipment.

### **Technical Assistance**

Our Customers recognize the important role INDIV has as the main source for projects... not only due to our technical expertise and service, but because we have a passion for excellence and quality.

INDIV provides poultry solutions around the world...and we are certain we can help with your next project!

**NEW**  
Innovative Feeding  
Products!

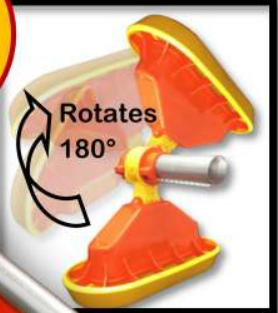

**Turbomate®**  
Automatic Baby  
Chick Feeder

- Greater live weight during the first week of age, between 8 to 12 grams versus feed tray to paper
- Better uniformity
- Improved feed conversion
- Greater weight gain at the end of the flock between 50 to 80 grams.
- Easy Access to feed minimizes feed waste
- Exclusive Rotation system from 0° to 180°
- Optimum space between Turbomate and other automatic feeders
- Capacity of 2.65 pounds
- Recommended density for 1 Turbomate is from 75 to 100 chicks
- Made with 100% high Density Virgin plastic and protective additives

**SEPHNOS**

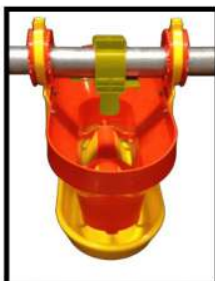

**TURBOHANG®**  
Innovative Rotary  
Hanging System!

- Exclusive Rotation System
- Greater live weight gain during the first week of age between 8-12 grams verses feed tray or paper.
- Greater weight at the end of the flock between 50 to 80 grams
- Better uniformity
- Improved feed conversion
- Easy cleaning and disinfection

**SEPHNOS**

**TURBOGROW 2 PLUS®**

**NEW**  
6th Generation  
Feeder!

- For Broilers, laying hens, breeding hens, and barnyard fowl during the 1st 15

- Decrease in feed conversion
- Mortality reduction
- Easy to store & clean
- Quick investment return

- New assembly system for better fit between hopper plate
- To be placed between automatic feeders
- Greater weight gain during the first week and at the end of the flock

## Chick Feeders

The Original  
Patented  
Chick Feeder !

### TURBOGROW 2 Chick Feeder

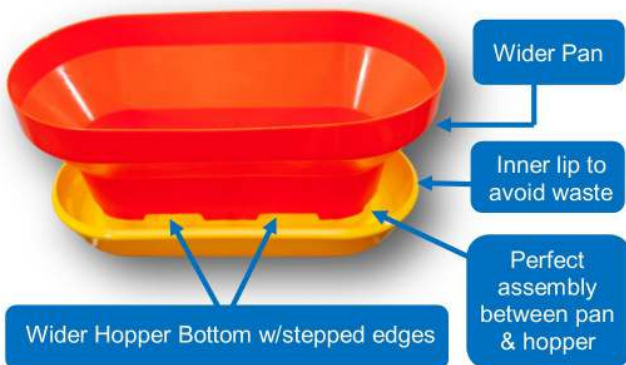

Third generation feeder for the reception of the broiler during its first 15 days

#### Benefits:

- Rounded rectangular design allows more space between automatic feeders for chicks to migrate easily between feeder and drinker lines.
- Special design of large inner lip keeps feed in the pan, not on the litter.
- Greater weight gain during the first week of age between 0.026 to 0.055 lbs.
- Greater weight at the end of the flock between 0.11 to 0.18 lb.
- Uniformity enhancements between 10% to 15%
- Mortality and cross infection are reduced
- Greater number of flocks per year

#### Specifications:

- Manufactured with 100% virgin plastic and additives
- Capacity of 5 kg. (11 lb)
- Recommended density of 1 TURBOGROW 2 for every 50 to 100 chicks
- Stackable design allows for quick and easy storage using minimal amount of space.
- 15" long x 6-1/4 " wide x 7-1/2" high

#### Maxi Fill Feeder

Placed in between automatic feeders to control the output of feed, it supplies a larger amount of feed to the chick feeders and insures that feed is always available .

#### TT Filler

Feed dispenser that controls the output of feed during the filling of the feeders.

### Turbogrow 1 For Broilers during the first 14 days

Chick feeder for the reception of the broiler in the floor or in a crate

### Turbogrow 3

For Broilers during the first 15 days

#### Benefits:

- Greater weight gain during the 1st week & at the end of the flock
- Improve feed conversion
- Greater number of flocks per year

# We customize feed lines to fit your needs!

**Coming Soon!**

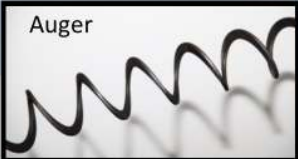

## NEW! MaxPlus NG Feeders

Our New generation Feed pans.  
Contact us for details!

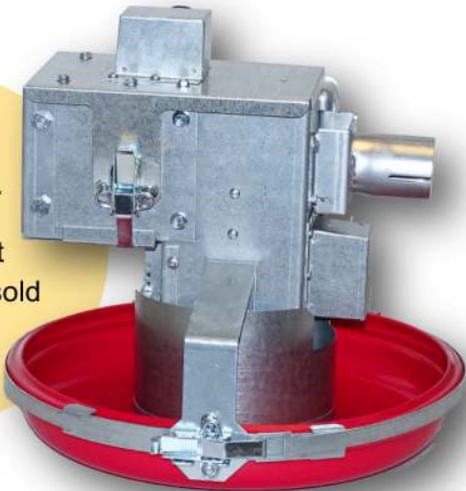

Gear Drive with Motor

Gear Drive

### Direct Drive Control Unit

Shown without motor. Motor sold separately.

### LED control Pan Feed Light

Designed to generate light at poultry-specific wavelengths that attract the birds and encourage feeding. It doesn't get hot (remaining cool to touch) creating a safe environment for birds, Can be attached to a variety of pan sizes.

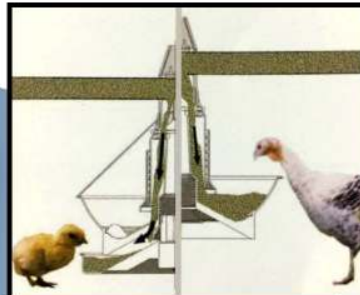

# Turkey Feeders

Manufactured in Italy & distributed in partnership with Giordano Poultry Plast

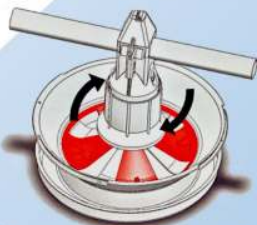

## Polyfeeder Multi-Stage Turkey

*High Quality, versatile turkey feeder that can be used in all-in and all-out buildings with the same feeder, and can be configured for either Brooding or Finishing!*

### Benefits

- For turkey poults, chicks use the lower part of the feeder
- During the finishing stage, adult birds use the top part of the feeder
- Feed flux can be precisely adjusted at all stages of feeding
- After 6-8 weeks, the bottom pan used for weaning can be removed for the grow-out cycle, which helps maintain a better hygienic environment

Patent pending open/close valve is the heart of the feeder and can be used in either brooding or finishing.

- Made of 100% virgin plastic & additives
- Greater weight gain of birds
- Mortality and cross infection reduced
- Decrease in feed conversion
- One Feeder for every 50-100 birds
- Greater number of flocks per year
- 26 Lb. capacity
- Feeder consists of hopper with screw-on adjustment button, pan and metal handle
- Available in Green for Turkeys or orange for Broilers

### Manual Hanging Turkey Feeders

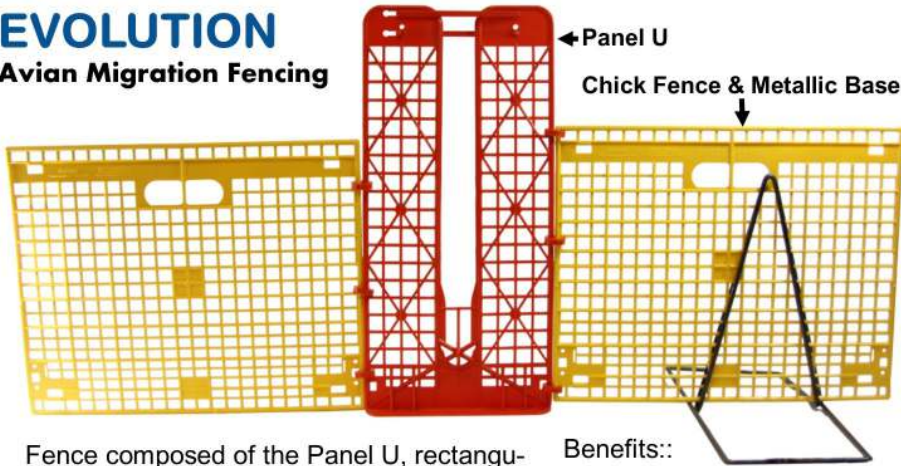

- Manufactured of galvanized metal
- 50 lb capacity
- Made in the USA

## Fencing

### EVOLUTION Avian Migration Fencing

Fence composed of the Panel U, rectangular panel Chick-Fence is made of strong and resistant squared plastic panels. The joint with straps are held by a strong metallic base, that forms a unique and differentiated Avian migration fence.

#### Benefits::

- Avoids avian migration
- Reduction of heat stress
- Enhances feed intake
- Improve feed conversion
- Birds waste less energy
- Mortality reduction

- 100% virgin plastic & Additives
- Fence composed of the U-Panel, Chick Fence & Metal base
- Air Spaces 80%
- Quick and easy storage with minimal space
- Customizable for your specific sizes and needs

## Drinkers

### Ignition V Drinker

Manual filling fountain placed on the floor or hanging by a strong handle for chicks, pullets and backyard birds.

#### Description:

- Manufactured with 100% virgin plastic and additives
- Drinker consists of Pan, bucket and handle
- Capacity: 1.40 Gallon
- Diameter of the pan: 12" (30cm)
- Height 11" (28 cm)
- Recommended density of one Ignition V for every 125 birds

#### Benefits

- Quick hydration and easy access of birds from day one
- Decreases heat and stress
- Improves feed intake
- Avoids the introduction of chicks and litter to the pan
- Easy to clean and store

### Ignition 1 Drinker

#### Description:

- Manufactured with 100% virgin plastic and additives
- Capacity: 1 & 1/2 Gallon
- Recommended density of one Ignition 1 for every 50 to 100 birds

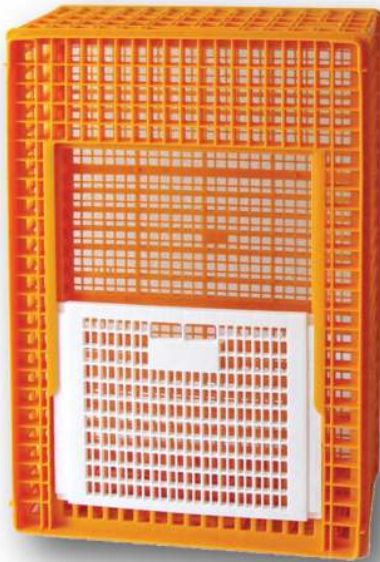

#### Benefits

- Hydrates fast
- Easy to clean
- Prevents heat stress
- Increases feed intake
- Prevents the introduction of the chick and litter to the pan

## Transportation & Storage

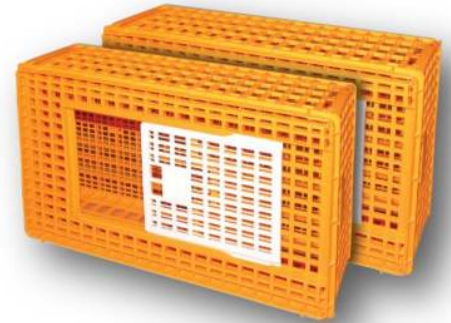

### Coops for Transporting Live Poultry

#### Piedmont Coops

The biggest, most secure, resistant and robust coop for transferring chickens on the market!

- Made of high density polyethylene, 100% virgin + UV additive (compliant with FDA and EEC)
- Temperature Resistance: 120 °C / -40 °C
- Smooth round surfaces safe for birds
- Top sliding door
- Size: 97 x 57 x 28 cm
- Weight: 8.25 KG
- \*Holds 18-20 chickens

\* Bird capacity may fluctuate depending on weight and climate

#### Mini Piedmont Coops

- Top sliding door
- Size: 77 x 57 x 29 cm
- Weight: 6.70 KG
- \*Holds 14-16 chickens

Because they are stackable, these live chicken transportation coops can reduce shipping costs by up to 50% !

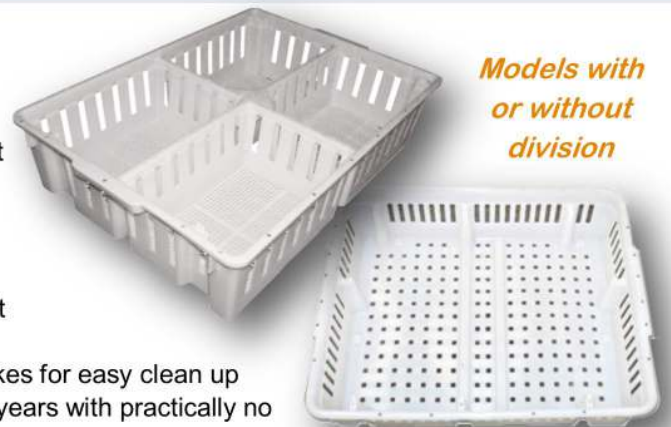

#### Poly Koop

- Made of high density polyethylene, 100% virgin + UV additive (compliant with FDA and EEC)
- Design allows better ventilation and more protection for your birds
- Top door: 31.75 x 41.94 cm
- Size: 9" or 11"
- Weight: 5.710 KG / 6.555 KG
- \*Holds 10-12 chickens

\* Bird capacity may fluctuate depending on weight and climate

#### Chick Boxes

- Strong, high density polyethylene used in the manufacturing of our paperless non divided chick boxes, provides rigid, impact resistant walls.
- Design prevents side walls from warping in hot weather, which prevents baby chicks from escaping
- Provides ample ventilation, helping to reduce mortality rates
- Weighs only 3 pounds, with molded handles for easier transport
- Boxes nest inside each other to save storage space
- Does not absorb moisture, dirt, chick litter and odors which makes for easy clean up
- Resistant to damage if dropped or stepped on, and will last for years with practically no maintenance.

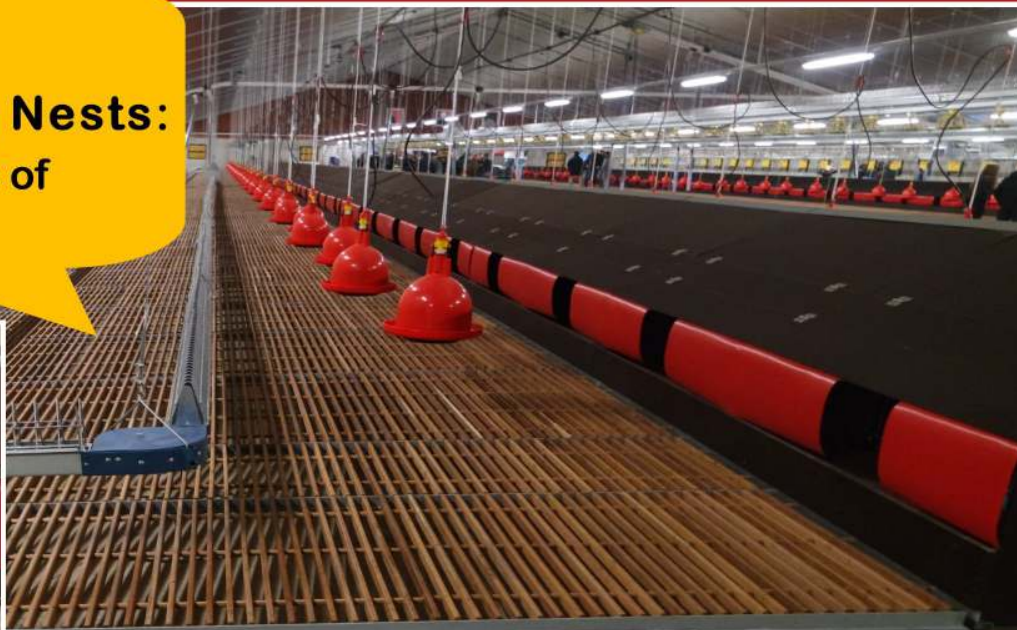

Models with or without division

### VAN GENT

**Roll-Away Laying Nests:  
Lowest Percentage of  
Floor eggs !**

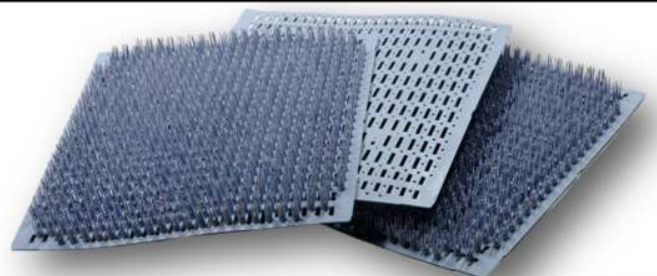

**The last generation in automatic community nests for breeding hens, broiler breeders and laying free-range system.**

- Suitable for incubation as well as consumption.
- Built with first class wooden plates, plywood on both sides, ensuring its easy cleaning and long useful life.
- Modular design, simple and stable construction make assembly quick and easy.
- A mechanical timer activates the eject system. The expulsion system makes the hens leave their nests and closes at the end of the day, avoiding dirty nests and broody hens. The result: Clean eggs are obtained.
- With the exclusive dual system of expulsion grids, the entire area of the nest can be used and it results in a familiar and comfortable ambient. The artificial turf carpet "Astro-Turf" has perforations that keep the nests free of dust and dirt. The comfortable climate of the nest allows the birds to feel good and comfortable to lay the eggs.
- The eggs roll out of the artificial turf carpet to the conveyor belt. The way the eggs move has been carefully designed to prevent breakage.
- The nest offers two separate conveyor belts, 25cm wide each, this makes the egg roll less, limiting to a minimum the possibility of broken eggs. The tapes are made of polypropylene (PP), fabric or perforated.
- The roof of the nest is articulated. One part, is for the inspection of the nest. The other part, can be removed to inspect the conveyor belt. This sector functions as a tunnel: It prevents the formation of air currents inside the nest and also maintains the tape free of particles and dust that can dirt the eggs and the belt.

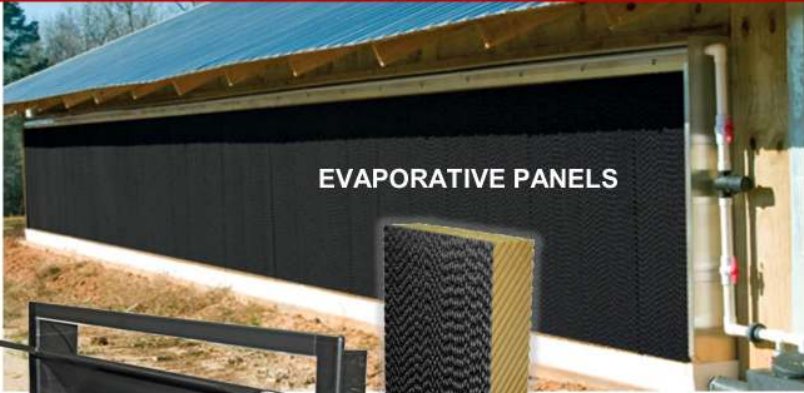

### **DURA-PAD<sup>™</sup>** POULTRY NEST PAD

- Easy to clean
- Safer Egg Roll off
- Increased comfort for hen
- Longer life
- Better filtration
- Rot / Corrosion proof
- High grade polypropylene
- Superior wear resistance
- Fewer Feathers stick to eggs

## Climate Control & Accessories

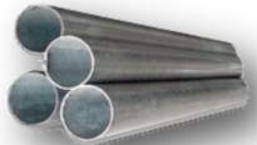

EVAPORATIVE PANELS

Inlets

Vent Doors

hoods

Tubing & Chords

**Universal Fan Motors** are characterized by their qualitative advantages and resistance in harsh environments allowing a reliable solution. The extensive motor line, developed and produced in-house in Holland, facilitates fan applications in different areas worldwide.

available in:

- 1 HP and 1.5 HP in 1~ 60 Hz
- 1 HP and 1.5 HP in 1~ 50 Hz

Winches

Pulleys

## HEATERS

Infrared panels, radiant tube heaters or turbo heaters...three options for reliable, clean and efficient heat.

## Meters

- Kestrel Weather meters
- Hygrometers
- Light Meters
- Thermometers
- Tachometers

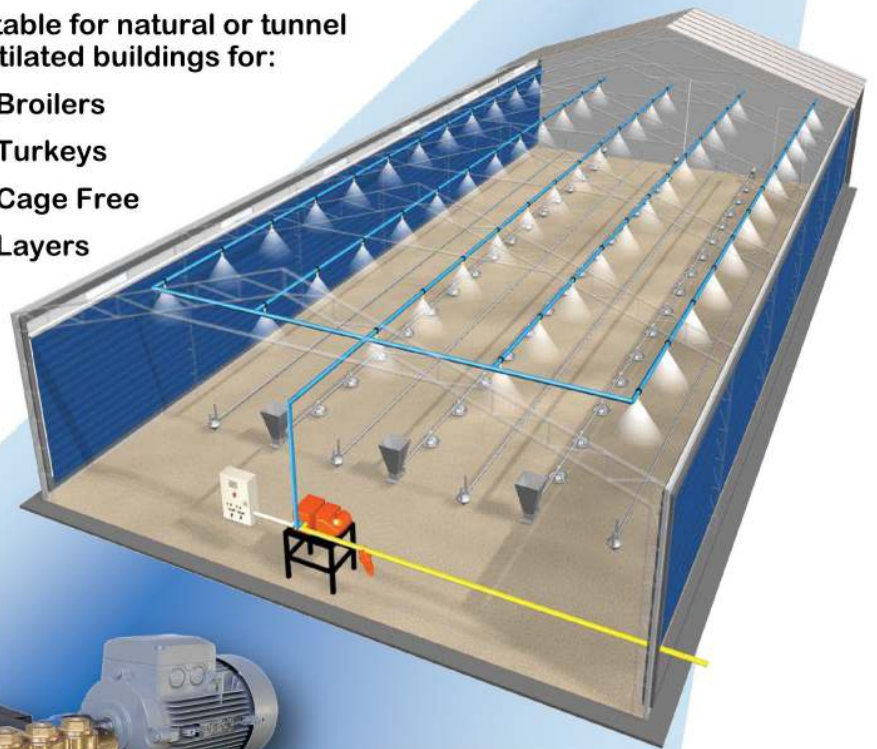

## Value Fog Systems

*Our affordable, high pressure fogging system creates a micro mist that evaporates quickly and cools without wetting the floor or equipment!*

Suitable for natural or tunnel ventilated buildings for:

- Broilers
- Turkeys
- Cage Free
- Layers

**We Design Systems  
To Fit Your  
Specific Needs !**

System includes:

- Triplex Plunger Pump
- Thermal Weld polypropylene tubing
- High Pressure Nozzle with anti-drip valve
- Triple Filter System
