Poultry and swine solutions  
around the world

The modern design and new colors for the **NG®** feeder line were selected to attract birds to the feed pan, improving feed conversion in all stages of growth.

**2 models are available:**  
**NG-4C** - With 4 Spoke  
**NG-14C** - With 14 Spoke

The **NG®** feed pan has a new, streamlined design and maintains a 14" diameter.

Rim-to-floor pan height allows the chicks easy access to feed.

For brooding, the pan is flat on the floor; with the feed flow height within the pan allowing birds to consume without wasting or spilling feed on the floor.

The new technical design of the **NG®** feeder, with the high quality plastics utilized, ensures years of trouble free use.

The **NG®** feed pan can be easily assembled or disassembled for quick and easy cleaning.

As the birds grow and the pan is raised, there are 4 possible regulations for feed flow in accordance with the user's needs.

Each unit can be removed or replaced without having to disassemble the tubing.

The **NG** feed pans include as standard a feed opening and shut-off valve.
