

The new Smart Manual Nest (ASMN) shares most of the advantages of the automatic roll away community with a unique patented design

Patented Design

Capacity: 120 egg layers / 100 breeders

Features:

- Maximum production of high quality eggs
- Minimum cracks in eggs
- Minimum floor eggs
- No need for bedding material, which can bring infection
- The eggs are collected from the central pull-out egg tray
- The perforated egg tray keeps the eggs separated to help reduce cracking and breaking
- The egg tray is made from plastic and is easy to clean
- The gentle sloping nest bottom ensures the eggs roll away quickly to the tray, allowing the eggs to cool down fast and remain cleaner
- The nest pad allows dirt and manure particles to fall through, resulting in cleaner eggs.

Early in the production period, the nest can be closed in the evening, so the birds will not learn to sleep or brood in the nest.

1. The eggs collection tray has a special design to prevent eggs from falling during collection.

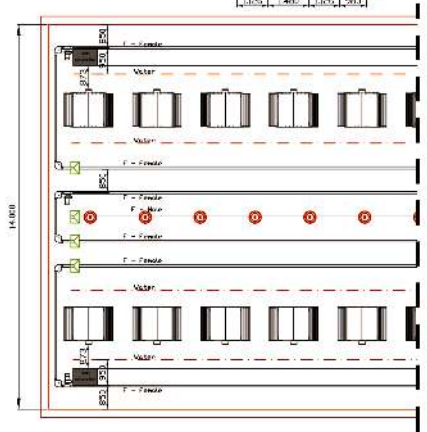

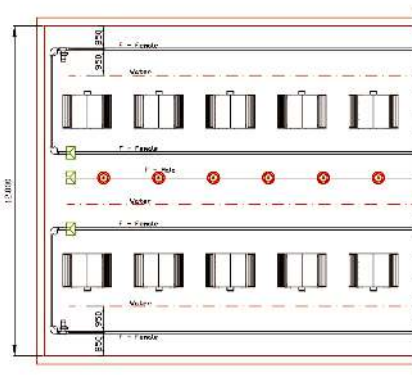

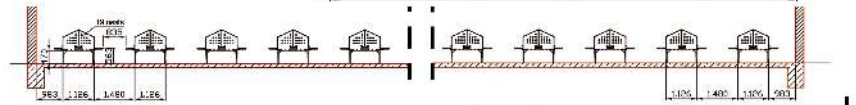

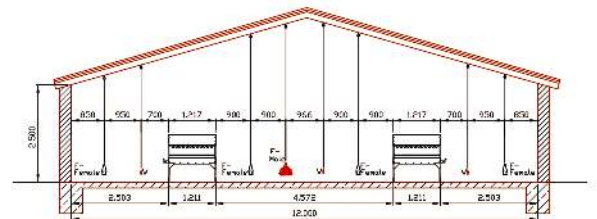

2. A simple system prevents eggs from rolling out during egg collection.

The nest can be automated if needed by removing the manual belt and adding an automatic belt with collection table. The nest can also be suspended.

- The nest can be automated if needed
- Made of high quality steel, size 120 x 120 cm (47.24" x 47.24") egg belt 23 cm (9.05")
- The nest is made for 100 broiler breeder birds or 120 layer / layer breeder

**Typical Nest
Layout for
Breeder House,
12 and 14 M width
(39.37 feet and
45.93 feet wide)**
