NEW!

Turkey Coops

GIORDANO

The new Giordano Poultry Plast Turkey coops are strong and durable, as well as hygienic and easy to clean. The health of the birds is protected thanks to excellent ventilation, easy stacking, and smooth, round surfaces which help prevent injuries (such as bruises and broken wings) during coop handling.

The coops are made with HD polyethylene and UV stabilized to reduce damage from sun rays.

The coop is very easy to assemble. No equipment is needed, as a simple pressure ensures the complete assembly of the coop.
